**Subject:** Land Status

Steve:

Good morning Steve. I was wondering if you have received the completed copies of the Archeological Clearances of the families in the Baca/Haystack area. If so could we get a copy of the clearances. The CSP group was wondering about the land status on some of the families. We received a call from Mike Ternak, P.E., LEED AP BD+C. Sustainable Engineering Program Manager and Susan Hill with ACOE are planning on setting up a meeting with families that are going to be temporarily housed.

Please let me know. Steve for your information I am no longer with the NNEPA Radon Program I am now working with the NNEPA Superfund Program. My contact number is 928.871.6284 or work cell number is 505.713.8227 or you can also contact me on my personal cell number.

Thank you and Happy Holidays, Vivian Craig
